

CONTROL & RELIABILITY

The FM-A Firing Module

Full compatibility with all existing FCs and FMs

Innovative Pyrotechnik GmbH
Steinwerkstrasse 2
71139 Ehningen
Germany

Phone: 0049 7034 25780
Fax: 0049 7034 257878

Email: pd@pyrodigital.com

CONTROL & RELIABILITY

CE and RoHS marking

Integrated 3-way splitter

Easy warehousing with S/N barcode

Innovative Pyrotechnik GmbH
Steinwerkstrasse 2
71139 Ehningen
Germany

Phone: 0049 7034 25780
Fax: 0049 7034 257878

Email: pd@pyrodigital.com

CONTROL & RELIABILITY

Flame-retardant Velcro cover
(included)

Enhanced
mounting
options

Safety cable notches

Innovative Pyrotechnik GmbH

CONTROL & RELIABILITY

Branded High-Quality Components

CONTROL & RELIABILITY

Dimensions

Weight

3.3 lbs

1.5 kg

CONTROL & RELIABILITY

Fully casted electronics and address unit

Resin protects from water and sulfur

Solid electrical connections

Quality press nuts on all screw terminals

CONTROL & RELIABILITY

Energy Buffer

- Additional capacitors enhance the firing performance
- Capacitors are charged in the background without interfering the PD-Bus
- Locally buffered energy supports firing in large networks and during fast firing
- Capacitors are safely discharged when the bus is turned off

CONTROL & RELIABILITY

Enhanced Safety

- Anti-electrostatic discharge circuitry
- Overvoltage and ESD protection
- Enhanced differential bus communication interface
- Additional frame checking of bus messages
- Enhanced safety during check-status by intelligent context interpretation of bus messages

CONTROL & RELIABILITY

High Quality Manufacturing

- In-line production with state-of-the-art machinery
- Automated camera inspection of each circuit board
- Automated functional test of each circuit board
- Comprehensive and automated End-Control Testing of each assembled FM-A

Test Protocol
